🪪 ABOUT ME

I am an engineer and a team-lead: I am passionate about technologies, have a broad engineering background, and I fond of team management. I thrive when developing great people, great teams, and great products.

💼 PROFESSIONAL EXPERIENCE

Mar 2017 – present

ITCraft (outsourcing), *DevOps Teamlead*
I started as a single DevOps engineer on a project, then hired one more engineer, and eventually, we evolved into a team of seven members. More than 40 successful projects of different sizes; increased team reputation and visibility inside the company (increased number of shared projects in the result); brought up senior and middle engineers from junior newcomers.

Nov 2014 – Sep 2016

YourServerAdmin (outsourcing), *CTO*
My position called CTO but in fact, that was a mix of CTO, BA, and PM. Key accomplishments: improved technical expertise of support team; improved task management and task velocity; increased team size; fostered the change of team mindset to agile thinking.

Jun 2011 – Nov 2014

YourServerAdmin (outsourcing), *Support Enngineer*
Grew up from a Level-1 tech support engineer, with responsibility for communication with customers and initial problem analysis, to Level-3 System Administrator responsible for complex technical tasks and daily shift management.

🧠 SKILLS

Leadership
Team motivation, mentoring, cultivating of soft/hard skills of team members.

Team culture
Fostering of team values and working principles, development of new ones together with the team.

Team development
Hiring the new team members and forming the needed team skillset.

Team resource & project management
Management of stand-alone DevOps projects or operations parts of big projects. Time and capacity management.

Public Clouds
Amazon Web Services: design and fine-tuning of resilient and HA infrastructures; costs optimization and security hardening.

Automation
Jenkins, GitlabCI, GithubActions, BitRise: deployments and tests automation (web and mobile)

Other techs - tag cloud
Docker, Python, Bash, Nginx, Apache, MySQL, MongoDB, Git, Linux

CERTIFICATES

AWS Solutions Architect Associate

LANGUAGES

English (Upper-Intermediate)

INTERESTS

Traveling
I like to explore new cities, countries, and people. Trying to visit 2-3 new countries per year.

Science
Fond of History, Astronomy, and Physics. I wish to see Betelgeuse supernova explosion in live someday, although the explosion date is somewhere between now and 50k years.
